

Project Title: HR Analytics Dashboard

Project Overview:

This project presents an interactive HR Analytics Dashboard that visually summarizes key HR metrics related to employee attrition. The dashboard is designed to help HR professionals identify trends and patterns in employee turnover using data visualizations. The insights gained from this project can be used to make informed decisions aimed at improving employee retention and organizational health.

Key Features:

- **Total Employees**: 1,470 employees in the organization.
- **Attrition Count**: 237 employees have left the company.
- **Attrition Rate**: 16.1%.
- **Average Age**: 37 years.
- **Average Salary**: \$6.5K.
- **Average Tenure**: 7 years.

Data Analysis Breakdown:

1. **Attrition by Education**:

- Life Sciences: 38%
- Medical: 27%
- Marketing: 15%
- Technical Degree: 14%
- Other: 5%

2. ****Attrition by Age Group****:

- 26-35 years: Highest attrition (116 employees).
- Followed by age groups 18-25 and 36-45.

3. ****Attrition by Salary****:

- Employees earning up to \$5K show the highest attrition (163 employees).
- Indicates a potential link between lower salary and higher attrition.

4. ****Attrition by Years at Company****:

- Peak attrition at 1 year (59 employees).
- Suggests early attrition is a concern.

5. ****Attrition by Gender****:

- Males: 140
- Females: 79

6. ****Attrition by Job Role****:

- Laboratory Technician: 62
- Sales Executive: 57
- Research Scientist: 47
- Sales Representative: 33

Tools Used:

- ****Excel / CSV**** for raw data
- ****Power BI / Tableau**** for visualization
- ****Python / Pandas**** for data preprocessing (optional, depending on implementation)

Conclusion:

The HR Analytics Dashboard project demonstrates how data-driven insights can be used to address workforce challenges. By visualizing key attrition metrics, the dashboard enables HR teams to identify problem areas and develop strategies to improve employee retention.
